PROFESSIONAL SUMMARY

Detail-oriented Frontend Developer with 2+ years of experience specializing in **React.js** and **Next.js**. Proven track record in building responsive, scalable web applications with **TypeScript** and modern UI frameworks like **Tailwind CSS** and **Shadcn**. Experienced in **CI/CD pipelines (GitHub Actions)**, **Docker**, and state management to deliver high-quality user experiences in agile environments.

CORE SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS.
- **Frameworks/Libraries: React.js**, **Next.js**, **Tailwind CSS**, **Shadcn**, Radix UI, Material UI (MUI).
- **State Management:** Zustand, React Hook Form, Formik.
- **Tools & DevOps: Git (Enhanced Git Flow)**, **GitHub Actions (CI/CD)**, **Docker**, Nginx, Linux (Ubuntu), Vercel.
- **Collaboration:** Agile/Scrum, Jira, Confluence, and cross-functional teamwork.
- **Other:** REST APIs (Axios/Fetch), JWT authentication, WebSockets, Zod validation, and i18n localization.

PROFESSIONAL EXPERIENCE

Frontend Developer
[Ace Plus Solutions] — [Yangon, Myanmar]
[April 2024 – Present]

- Develop and maintain scalable frontend applications using **Next.js** and **TypeScript**.
- Build reusable UI components and design systems to ensure UI/UX consistency across platforms.
- Integrate complex REST APIs for dynamic data rendering and role-based access control (JWT).
- Optimize performance via memoization, code splitting, and debouncing to ensure faster load times.
- Collaborate with backend teams in an Agile environment to deliver feature-rich updates.

PROJECTS

User Service | *Next.js, TypeScript, Zustand, ShadCn, Formik, REST APIs*

- Built modular user management features including registration, login, and profile handling and connect with other products.
- Implemented reusable form components using **Formik** with validation schemas.
- Integrated multiple **REST APIs** for user data, role assignment, and access control.
- Developed UI using **ShadCN** to ensure consistency and scalability.

HR Master | *React, Typescript, Zustand, MUI, Formik, REST APIs*

- Designed architecture for a scalable HR system handling employee records and workflow modules.
- Implemented core features including employee CRUD, leave workflows, payroll management, attendance mangament, interview management, etc.
- Optimized performance with memoization, pagination, and debounced search.
- Enhanced UX with MUI components, custom modals, and responsive design.

Ticket Management | *Next, Typescript, MUI, Formik, REST APIs*

- Developed a full ticket lifecycle system with create, assign, track, and close workflows.
- Created dashboards for ticket status, categories, and user assignments.
- Integrated multiple APIs for ticket CRUD, comments, attachments, and filters.

GHG Emission Tracking Platform | *Next.js, TypeScript, Shadcn, Zod, WebSockets*

- Developed a comprehensive Greenhouse Gas (GHG) tracking dashboard using **Next.js** and **TypeScript** for optimal performance and type safety.
- Designed a modern, accessible user interface with **Shadcn** and implemented interactive drag-and-drop workflows using **Dnd Kit**.
- Ensured robust data integrity through **Zod** schema validation and supported global accessibility via L**ocalization** (i18n).

GHG Emission Platform (Maintenance) | *Next.js, Typescript, MUI, React hook form*

- Maintained and optimized an existing environmental tracking application built on **Next.js** and **TypeScript**.
- Improved application stability by resolving critical bugs and refactoring complex forms using **React Hook Form**.
- Managed UI updates using **Material UI (MUI)** and ensured data consistency through reliable **REST API** integration.

Dealer Claim Management | *Next, Typescript, ShadCn, Zod (Next Full stack application)*

- **Streamlined warranty claim workflows** by developing a centralized management portal, reducing processing time for regional dealerships.
- **Implemented complex business logic** to validate claim eligibility, ensuring 100% compliance with Toyota's corporate service standards.
- **Engineered an automated notification system** to provide real-time status updates to dealers, improving communication transparency.
- **Optimized database queries** to handle high volumes of historical claim data, ensuring fast retrieval for auditing and reporting.

Freelances Project

Clinic Management: *React, Typescript, MUI, Formik, REST APIs, Dnd kits,*

- Engineered a custom clinic administration platform using **React** and **TypeScript** to streamline patient and appointment management.
- Built a responsive and intuitive administrative interface using **Material UI (MUI)**.
- Implemented complex form handling and validation for medical records using **Formik**, integrated seamlessly with backend **REST APIs**.

Own Project

Learning Management: *React, Typescript, ShadCn, Zod, REST APIs, Web socket*

- Developed an interactive educational platform facilitating seamless collaboration between teachers and students using **React** and **TypeScript**.
- Implemented **WebSockets** to power real-time messaging services, enabling instant communication and support within the application.
- Designed a clean, type-safe user interface utilizing **Shadcn UI** components and **Zod** for rigorous schema validation.

Quotation Management: *React, Typescript, ShadCn, Zod, REST APIs,*

- Engineered a digital quotation system using **React** to streamline proposal creation and pricing calculations.
- Integrated **Zod** for strict validation of financial data, minimizing errors in cost estimation and line-item entry.
- Utilized **Shadcn UI** to build a responsive interface for managing client data and quote lifecycles via **REST APIs**.

Perfume E-commerce: *React, Next js, Typescript, ShadCn, Zod, REST APIs,*

- Developed a highly responsive, SEO-optimized storefront using **Next.js**, **TypeScript**, and **Tailwind CSS**.
- Architected a scalable backend and database with **Node.js**, **PostgreSQL**, and **Prisma ORM** for real-time inventory and catalog management.
- Implemented seamless shopping cart and multi-step checkout workflows utilizing **Zustand** for efficient global state management.

EDUCATION

Bachelor’s Degree in Computing | University of Greenwich — (2026)

Level 4 & 5 Diploma of Computing with Business Management | Strategy First University - (2020 - 2023)

ADDITIONAL SKILLS

- **Professional:** Problem-solving, Critical Thinking, Time Management, Cross-functional Collaboration.
- **Workflow:** Agile Methodologies, Git/Version Control, Responsive Design Principles, Code Optimization.
- **Traits:** Self-Starter, Continuous Learning, Adaptable to new technologies.
